🏢 RESEARCH PROJECTS

Multi-Camera Video Analysis Jan. 2019 – Present

- › Associate and track multiple humans between the top bird's eye view and horizontal egocentric view.
- › Detect the co-interest person via the human visual attention using complementary-view cameras.
- › Detect and recognize the human-human interactive activity in crowded scene with graph neural network.

Visual Object Tracking Jul. 2017 – Present

- › Design the dynamic/selective content-aware regularization in spatial-temporal domain for correlation filter (CF) based visual object tracking.
- › Propose a new weighting sample based approach for CF tracking to alleviate the boundary effects.

Visual Positioning & Precision Measurement Sep. 2016 – Jul. 2017

- › Inspect the fine-grained change of cultural relics under real-world hosting environments via visual positioning and precision measurement.
- › Active recurrence of lighting condition for fine-grained change detection.
